Dear <Chosen Local Politicians>,

**Example Letter :**

I am writing to you to express my concerns about two pressing issues that are affecting Ohio's environment: light pollution and river pollution. As a resident of Ohio, I have noticed a significant increase in the amount of light pollution in the sky over the past few years. It has become increasingly difficult to enjoy the night sky due to the bright lights that are constantly on, even during the late hours of the night. This issue not only affects our ability to stargaze but also disrupts the natural environment and wildlife. I urge you to take immediate action to address this issue and help preserve Ohio's natural beauty.

Another pressing issue that I would like to bring to your attention is river pollution. The Ohio River, which is an important natural resource for our state, has been contaminated with harmful pollutants. These pollutants are not only hazardous to the wildlife that rely on the river but also to the health and safety of those who use the river for recreational activities. This issue requires urgent attention from the government to find a solution and take necessary measures to clean up the river and prevent further pollution.

As the governor of Ohio, I urge you to take proactive measures to address these issues and ensure that Ohio remains a safe and healthy place to live. By investing in renewable energy sources and enforcing stricter regulations on industries that contribute to light pollution, we can reduce the negative impact on the environment. Additionally, I strongly recommend implementing stricter regulations on waste disposal and improving water treatment facilities to prevent further river pollution.

I hope that you will take these concerns seriously and act promptly to ensure a better future for Ohio. Thank you for your time and attention.

Sincerely,
